

The Role of Geomechanics in Stimulation

Sponsorship Information Package

Join Us in Bahrain 3-5 April 2018!

The American Rock Mechanics Association and Dhahran Geoscience Society invite you to participate as a sponsor of the 2018 ARMA-DGS Workshop: the Role of Geomechanics in Stimulation to be held on 3 – 5 April 2018, In Manama, Bahrain.

The ARMA-DGS workshop will focus on not only the breadth and depth of fracturing technologies, but also their values through field applications. The workshop is expected to attract delegates from North America, the Middle East, Europe, Asia, and Africa, including operators, service providers and leading researchers from universities and national labs. Our comprehensive training, technical, and exhibit programs allow sponsoring firms to receive maximum exposure and interaction with this audience of industry leaders and technology stakeholders.

Various levels of sponsorship opportunity are available at Platinum, Gold, Silver, and Bronze levels that include excellent exposure before, during, and after the symposium, as well as complimentary delegate attendance. Numerous single-event sponsorships are also available. Choose an overall level of support to gain the exposure you're looking for, or combine one of our levels with an event sponsorship to increase your firm's visibility.

Sponsorship opportunities start as low as \$1000, ensuring that all companies can participate in this premiere hydraulic fracturing workshop.

We are happy to discuss the different options and how we can tailor a package to meet your budget and marketing objectives.

We look forward to seeing you in Bahrain!
